

SHANTANU VERMA

Data Engineer

☎ +91-9873300449 ✉ connectshantanu01@gmail.com 🌐 LinkedIn 📍 Delhi, India

SUMMARY

Data Engineer with 4 years of experience in Python, PySpark, SQL, Databricks, Airflow, Azure, and AWS. Specialized in Apache Airflow orchestration, Kafka-based CDC pipelines, and Databricks Lakehouse architecture, with a track record of improving pipeline performance, reliability, and data quality across healthcare and enterprise platforms — boosting pipeline efficiency by up to **60%** and reducing system overhead by **40%**.

EXPERIENCE

Senior Data Engineer, Veersa Technologies

Oct 2025 – Present

HealthEdge – PDM (Provider Data Management)

Noida, Uttar Pradesh

- Built end-to-end **ETL** pipelines supporting provider data lifecycle across healthcare systems.
- Co-led the design and implementation of a scalable **CDC** solution using **Kafka**, **Debezium**, and **Kafka-Connect**, enabling near real-time data synchronization between transactional systems and downstream applications.
- Designed **Airflow-based** ingestion workflows using **Python** and **SQL** to monitor inbound feeds and trigger **Databricks** jobs, improving pipeline reliability.
- Led **CI/CD** deployments of ETL pipelines across Dev, QA, and Prod environments.
- Enhanced data quality framework using **PySpark** and advanced SQL queries, improving validation and accuracy.
- Engineered a FastAPI-based DAG trigger system, reducing Airflow runs from **144K to 300/day** and lowering scheduler CPU usage from **80% to 20%**.

Sr. Programmer (Data Engineer), MEDTEK DOT AI

Dec 2022 – Sep 2025

Exelixis Inc.

Noida, Uttar Pradesh

- Implemented medallion architecture (Bronze, Silver, Gold) using **AWS Glue** and **Delta Lake on S3**, enabling scalable, maintainable transformations across the data lakehouse.
- Modernized and migrated **100+** legacy pipelines to **Databricks**, using PySpark, SQL, Airflow, and Delta Live Tables, with **EMR** clusters supporting large-scale batch processing.
- Orchestrated end-to-end ETL pipelines combining Airflow-triggered Databricks jobs with **AWS Glue jobs** and **Lambda functions** for event-driven, config-driven parameterization, cutting manual intervention by **60%**.
- Built decoupled, event-driven workflows using **Amazon SQS** and **SNS** to handle pipeline notifications, retries, and failure alerts across distributed jobs.
- Loaded curated Gold-layer datasets into **Amazon Redshift** for downstream analytics and reporting consumption by business teams.
- Improved pipeline performance by **60%** and reduced operational overhead by **40%** across 19 payers through optimized AWS-based orchestration and storage strategies

Analyst, PW (PhysicsWallah)

Sep 2022 - Dec 2022

Trainee

Noida, Uttar Pradesh

- Developed and optimized parameterized, automated **SQL** scripts for data extraction and dashboard reporting, reducing manual processing by **30%** and improving reporting efficiency and query performance by **40%**.
- Utilized Python (**NumPy** and **Pandas**) for data cleaning, manipulation, and transformation of structured datasets.

TECHNICAL SKILLS

Languages: Python, PySpark, SQL

Streaming: Apache Kafka, Debezium

Cloud: Azure (ADLS, Key Vault), AWS (S3, Lambda, EMR, SES, SQS, SNS, Glue)

Data Platforms: Databricks, Delta Live Tables (DLT), Unity Catalog

Orchestration: Apache Airflow, Azure Data Factory

Databases and devops: Postgres, MySQL, Amazon Redshift, Git, CI/CD

EDUCATION

USICT | Guru Gobind Singh Indraprastha University

Aug 2022

B.Tech in Computer Science and Engineering

Delhi, India

CERTIFICATIONS & ACHIEVEMENTS

- IBM Developer: Machine Learning with Python.
- Highflyer of the Quarter Q1 – Veersa Technologies.
